B.Tech Information Technology Student • Data Analytics • SQL • Python • Business Insights • Problem Solving

PROFILE

Fourth-year B.Tech IT student at K.J. Somaiya Institute of Technology with a strong interest in Data Analytics and Data Science. Skilled in Python, SQL, Pandas, NumPy, Excel, Power BI, and data visualization, with hands-on experience in data cleaning, exploratory data analysis (EDA), feature extraction, and building end-to-end data-driven projects. Passionate about transforming raw data into meaningful insights and continuously learning machine learning techniques to solve real-world business problems.

EDUCATION

B.Tech - Information Technology*Expected 2027*
K.J. Somaiya Institute of Technology, Mumbai (Affiliated to University of Mumbai)

Relevant Coursework: Data Structures & Algorithms, OOP, Cloud Computing, Database Management, AI

Higher Secondary Education (Science - PCM + CS)*2021 - 2023*
K.M. Agrawal College, Kalyan | Secondary School Education (SSC), Don Bosco School, Kalyan - 2021

TECHNICAL SKILLS

Programming Languages: Python, SQL

Data Structures & Algorithms: Arrays, Strings, Hashing, Two Pointers, Sliding Window, Searching & Sorting, Linked Lists, Stacks, Queues, Binary Search, Recursion, Trees, Graphs, Greedy Algorithms, Dynamic Programming, Time & Space Complexity

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Microsoft Excel, Power BI

Machine Learning: Scikit-learn | Databases: MySQL

Core CS Subjects: Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN).

Tools & Platforms: Git, GitHub, Google Colab, Jupyter Notebook

PROJECTS

Neural Trace Auditor - Interpretable Multimodal Reasoning*Sem VI-VII, 2025-26*

- Built a multimodal mechanistic interpretability platform for vision-language transformer models (CLIP) using patch-based image ablation, token-level contribution analysis, and layer-wise activation tracing to expose internal neural reasoning.
- Developed a Modality Gap Analysis module measuring cross-modal alignment and Evidence Decomposition graphs tracking positive vs. negative evidence per layer.
- Built an interactive Streamlit dashboard visualizing similarity scores, saliency maps, and activation plots. Stack: Python, PyTorch, CLIP, HuggingFace Transformers, Streamlit.

CalmSpace - Mood Detection Using AI*Sem V, 2025-26*

- Designed a full-stack AI-powered journaling application enabling users to log daily reflections and receive AI-driven emotional insights in real time.
- Fine-tuned a DistilBERT transformer model to classify journal entries into six emotion categories with high accuracy; integrated Mistral (via Ollama) as an empathetic recommendations engine.
- Visualized emotion trends with interactive Chart.js donut charts; secured user data with JWT authentication and encrypted MongoDB Atlas storage.

Go2Guide - Tourist Explorer Website*Sem IV, 2024-25*

- Built a Django-based travel planning platform with theme-based city categorization, safety precautions, and Leaflet.js interactive itinerary mapping (start point, stops, end point).
- Implemented a Django Admin panel for non-technical CRUD content management across cities, places, and itineraries.

ACTIVITIES & ACHIEVEMENTS

- Attended a Cloud Computing Workshop conducted by IIT Bombay; regularly explores Data Analytics, ML, and AI blogs and builds personal projects in data engineering and predictive modeling.

INTERESTS

• Data Analytics • SQL & Databases • Python Development • Cloud Computing • Technology Startups • Automobiles • Cricket
